My client base consists of international management and technology consultancies, and multi-billion euro in-house companies across the European Market. My role involves the entire recruitment life cycle; business development, candidate search, screening/qualification, and management of recruitment process from start to finish.

## Expertise

- Information Security
- Network Security, Application Security, Cloud Security
- Security Architecture/Engineering
- SOC/IR - Incident Response/CERT/CSIRT/SIEM
- Penetration Testing
- Identity & Access Management.

## Clients

## Testimonials

“

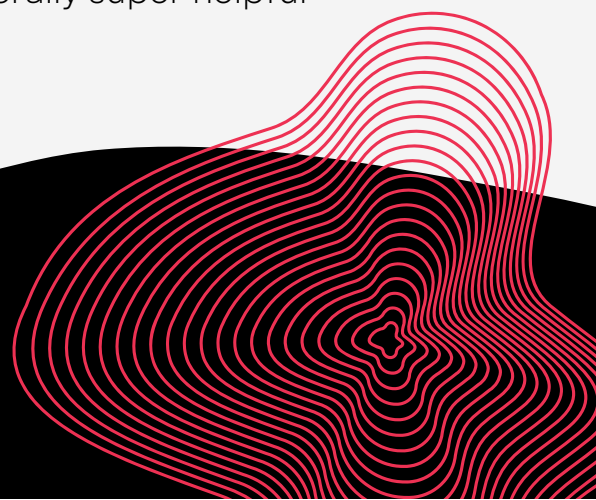

Jack was absolutely fantastic throughout the recruitment process. He kept me informed through all stages of my application, was prompt with his communication, and provided relevant information/feedback whenever I asked. He really helped put me at ease whenever there were delays, and was generally super helpful with whatever questions I had.

## Testimonials

“ Our team had the ambitious goal of doubling our Product and Engineering department, including senior management roles, by the end of the year. With Jack and his teams support we were able to not only hit our hiring targets ,but also hire great talent, from diverse backgrounds who we would not have had access to otherwise. We were always impressed by the profiles his team put forward and they were able to drastically reduce our hiring time with their effective pre-screening, always keeping us informed along the way. I would recommend Jack to anyone looking for great recruiting support ”
